رؤية VISION
2030
المملكة العربية السعودية
KINGDOM OF SAUDI ARABIA

ABOUT US

Future Vision Company started in 2015 to support Saudi Arabia's fast-growing economy. Since then, we've become a trusted partner in construction, maintenance, manpower, equipment, and trading. Getting the job done reliably and with care.

Future Vision's IT & Telecommunications Division helps design and implement end-to-end IT infrastructure, connected systems, and smart services for vital sectors like oil & gas, construction, logistics and general business operations all while helping drive the Kingdom's Vision 2030 initiative forward.

As part of our continued evolution, we now integrate **AI-enhanced** capabilities across all of our services. Enabling smarter monitoring, stronger protection, and more efficient operations in alignment with the Kingdom's **Vision 2030** digital transformation goals.

Our Mission

To empower organizations with secure, intelligent, and future-ready technology solutions that advance Saudi Arabia's digital ambitions.

Our Vision

To be a leading technology partner delivering secure, modern, and high-performance solutions across Saudi Arabia and the GCC.

OUR SERVICES

IT & DIGITAL INFRASTRUCTURE

CLOUD, ERP & CRM

SMART SECURITY & SAFETY

POWER & CONNECTIVITY

CYBERSECURITY & COMPLIANCE

MANAGED SERVICES

AI SYSTEMS INTEGRATION & AUTOMATION

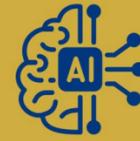

IT & DIGITAL INFRASTRUCTURE

Building the foundations of reliable and secure operations with enterprise-grade IT systems, networks, and communication tools.

- **Computers & Peripherals** – desktops, laptops, printers, scanners, displays
 - **Network Hardware** – switches, routers, firewalls, wireless access points
 - **Telephony** – enterprise IP phones and communication systems
 - **Indoor Cabling Services** – structured cabling and fiber optic splicing
-
- **AI-Optimized Networking** – improve speed and stability by analyzing traffic and adjusting performance
 - **Smart Asset Management** – track computers and equipment health for easier planning and upgrades, detect early signs of failure, and easy access to self-service solutions

SMART SECURITY & SAFETY

Protecting people, tracking assets, and managing sites with advanced monitoring and access systems.

- **CCTV & Monitoring** – cameras, DVRs/NVRs, remote site monitoring
 - **Asset Tracking** – AVL Systems, Barcode scanning & RFID Tracking
 - **Access Control & Attendance** – card readers, biometrics, attendance systems
 - **Worker Safety** – wearables, gas/heat/weather detection systems
 - **Project Control Centers** – Aramco-Compliant SCC/PCC setup and integration
- **24/7 Automated Video Monitoring** – object detection, intrusion alerts, and unusual-activity recognition
 - **Smart Safety Compliance** – PPE detection, restricted-zone alerts, and crowd/queue monitoring
 - **Predictive Risk Reports** – heatmaps, movement patterns, and early detection of site abnormalities

CYBERSECURITY & COMPLIANCE

Safeguarding digital assets and ensuring full alignment with national and enterprise security standards, including Saudi Aramco Cybersecurity & Compliance Certification (CCC).

- **Endpoint Security** – Antivirus solutions & company-wide security procedures
 - **Data Sanitization & Destruction** – NIST 800-88 certified tools and sanitization services
 - **Network Security** – firewall integration, anti-spam systems, SIEM integration
 - **Certification Support** – CCC audit preparation with RSM, KPMG or Sirar by STC
-
- **Real-time Threat Detection** – anomaly spotting, suspicious activity alerts, and behavior-based monitoring
 - **Smart Log Analysis** – automated correlation, risk scoring, and compliance insights
 - **Predictive Security Analysis** – identifying weaknesses and recommending remediation steps

CLOUD, ERP & CRM

Simplifying business operations with secure cloud platforms, integrated enterprise systems, and tailored workflow solutions.

- **Cloud Storage** – Google Workspace, Microsoft 365, and enterprise-grade cloud platforms
 - **On-Site Storage & VPN** – Dell EMC, HPE, and secure remote-access solutions
 - **ERP / CRM Platforms** – SAP, Oracle JD Edwards, Microsoft Dynamics, Odoo, Zoho, Salesforce, and more
- **Assisted Workflows** – automated processes, approvals, and operational routines across ERP and CRM
 - **Smart Data Reports** – automated KPIs, forecasting, and anomaly detection within business systems
 - **Intelligent User Support** – AI-powered assistance for routine tasks, data entry, and information retrieval

POWER & CONNECTIVITY

Ensuring operational continuity with resilient power systems, stable long-distance connectivity, and high-quality cabling infrastructure.

- **Power & Backup** – UPS, solar power solutions, and standby generators
 - **Remote Connectivity** – microwave towers, satellite communications, and point-to-point links
 - **Outdoor Cabling Services** – fiber optic pulling, Cat8 cabling and power cable installations
- **Predictive Power Reports** – early detection of battery degradation, load anomalies, and power irregularities
 - **Smart Connectivity Monitoring** – automated signal analysis, link stability tracking, and outage prediction
 - **Intelligent Resource Optimization** – usage analytics for power distribution and network efficiency

MANAGED SERVICES

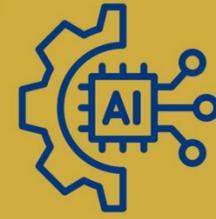

Keeping your systems running smoothly through proactive monitoring, rapid support, and ongoing performance optimization.

- **Preventive Maintenance** – scheduled health checks, system updates, hardware inspections, and performance tuning
- **Corrective Support** – rapid troubleshooting, repairs, and replacements when issues arise
- **IT Infrastructure Management** – coverage for servers, networks, telephony, storage, and peripherals
- **Flexible Service Plans** – tailored packages for critical sites, remote locations, and standard office environments

- **Predictive Insights** – early identification of system degradation, hardware risks, and service needs
- **Support Automation** – automated issue detection, ticket creation, and suggested troubleshooting step
- **Performance Reports** – real-time monitoring, usage insights, and optimization recommendations for critical systems

AI SYSTEMS INTEGRATION & AUTOMATION

Transforming business operations with intelligent workflows, automated processes, and connected AI systems tailored to your organization.

- **Workflows Automation** – custom multi-step processes, approvals, and operational routines powered by AI
- **AI Assistants** – AI-driven tools that support teams with information retrieval, data entry, and routine tasks
- **Predictive Analytics** – forecasting, anomaly detection, and business insights tailored to operational data
- **Systems Integration** – connecting AI modules with existing ERP, CRM, security, and IT platforms
- **Document Automation** – automated extraction, classification, and processing of documents, invoices, and reports

OUR PROCESS

With over 500 skilled professionals, Future Vision Company assigns the right expertise to every project and closely monitors progress to ensure efficiency, safety, and on-time delivery. Backed by advanced tools and continuous training, our teams turn plans into successful results from procurement to deployment.
